What is the

PBS PARTNER PROGRAM ?

PBS Systems proudly works in conjunction with various companies to deliver seamless services to shared customers.

The **PBS Partner Program** encourages collaboration and relationship building, enabling us to efficiently meet our shared customers' needs.

Open to all potential partners, the program ensures that data requirements are handled in a secure and timely manner.

HOW DOES IT WORK?

A preliminary questionnaire must be completed to facilitate guiding your organization towards the best methodology for meeting our shared customers' requirements.

PBS can facilitate this process by providing transactional data on the customer's behalf through secure data access via API.

API

APPLICATION PRODUCT INTERFACE

PBS can provide API access for data requirements or offer a two-way data interface.

Supporting both XML and JSON in a secure data transfer environment, partners leveraging a wide array of technology stacks can easily provide valuable services to dealerships.

Developing and certifying these integrations through our Partner Program provides our shared customers with confidence that their business and data integrity is our collective priority.

*There is an initial consultation process and subsequent certification testing, with test cases required as well as appropriate fees for all of these services.
